About me

Embarking on my journey as a software engineer, I adeptly navigate the intricacies of coding and client interaction. Leading a team of 8, I seamlessly handle tasks, Jira tracking, and agile methodologies. Rooted in leadership from school days as the Assistant Minister for Health and Cleanliness, my role as the Interact Club Secretary showcased my organizational finesse in orchestrating a spectrum of intra-school events, spanning from Counter-Strike competitions to Mehendi and Chess. College life saw me as the Campus Ambassador for IIT Kharagpur's Spring Fest, and as a dedicated placement coordinator, I facilitated student placements while collaborating on operational arrangements for a smooth placement process. This journey reflects not just technical prowess but also my commitment to community engagement, diverse event orchestration, and a robust foundation in leadership and management.

Skills

- GCP
- RDBMS
- Python
- NodeJS

Education

2016-2020	Computer Science Engineering CGPA :- 8.79	ITER, S'O'A University
